INCREASED WAGES TOOK
97% OF INCREASED RATES.

Increases in freight and passenger rates made during federal control amounted to \$1,835,000.00 when applied to the traffic moved up to July 31, 1919, while the increases in wages applied to the number of employees and the hours or days worked in July, 1919, amounted to \$1,774,800,000, or 97 per cent of the revenue from the increased rates, according to a statement compiled by the Interstate Commerce Commission at the request of Senator E. D. Smith of South Carolina and presented by him in the senate on December 29.

"Old Timers" on Rhine Again. Quite a number of regular "old timers" who marched to the Rhine with the American army of occupation in December, 1918, and who have been to the United States and discharged, and enlisted again, go to make up the Fifth and Fifth Infantry regiments which arrived recently in the vicinity of Coblenz to await possible dispatch in the near future to Upper Silesia to supervise the plebiscite. Some of them saw ten and twelve months' service in France and Belgium before the armistice.

Russ Loses 35,000,000. The Polish professor, A. A. Ossendofsky, chief of the intelligence department of the all-Russian government, estimates that the world war, bolshevism, civil war, starvation and disease has cost Russia a total of 35,000 lives. He places the cost of bolshevism at 12,280,000 lives. Professor Ossendofsky says that formerly the Russian population increased at the rate of four persons a minute. Today it is decreasing at the rate of twelve to thirteen a minute.

MILLIONS IN U. S. OWN RAILROADS

Wage Earners Directly and Indirectly Affected by Roads' Solvency.

DIVISION OF SECURITIES.

Mutual Savings Banks Owned Entirely by Depositors Hold Large Amount of Railway Bonds.

Millions of thrifty Americans who have laid aside something for a "rainy day" are directly or indirectly owners of railroad securities. This ownership represents not only individual investment in the railroads, but holdings of railroad securities by life insurance companies, savings banks, fire and marine insurance companies, benevolent associations, educational institutions, trust companies and State and National banks. A large part of the assets of these institutions depend on the solvency of the railroads.

The ownership of railroad securities among these people is divided approximately as follows:

Individuals, numbering over 1,000,000 own outright about \$10,000,000,000 in railroad securities. Over 600,000 are stockholders with an average holding of \$13,956.

Life insurance companies, with 53,000,000 policies in force, own nearly \$2,000,000,000 of railway securities.

Savings banks, with 10,000,000 depositors, own \$847,000,000.

Fire and marine insurance companies, casualty and surety companies own a total of \$649,000,000.

Benevolent associations, colleges, schools, charitable institutions, etc., own \$350,000,000.

Trust companies, State and National banks own \$885,000,000.

According to statistics compiled for the Association of Life Insurance Presidents in 1918, 75 per cent of life insurance companies' assets were invested in railroad bonds, and during the first half of 1919 the percentage of railroad bonds held by the life insurance companies was 28.25 of the total assets of these companies.

Interest of Wage Earners. In addition to this widespread ownership of equities of American railroads by the people of the United States every wage earner who puts money into the savings bank has a direct interest in the soundness of railroad investment on account of the large part of the savings of men and women wage earners secured by the railroad bonds which are bought by the savings banks.

A great many of these institutions are mutual savings banks which have no capital stock, pay no dividends, earn no profits for stockholders, and their entire property belongs to the depositors. Every dollar that the bank earns beyond the actual cost of doing business also belongs to them.

The report of the United States Comptroller of the Currency for 1918 shows that 625 of these savings banks operated on the mutual plan had at the end of 1918 total deposits of \$4,422,008,333.15 credited to 9,011,494 depositors, an average deposit of \$490.72. These figures covered mutual savings banks in 18 states of the Union.

The Comptroller's report gives the amount of railroad bonds held by mutual savings banks in the six New England states—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island and Connecticut—as \$406,272,166. The report of the State Superintendent of Banks of New York shows that the railroad bonds held by the mutual savings banks at the end of 1918 in New York amounted to \$361,711,834.

To Think and to Know. A Charleston housewife being suddenly deserted by her cook advertised for another, stipulating that applicants must bring good references. The only response to the advertisement was a very fat and very black old woman who seemed promising until she was asked for her references.

"Deed, honey, Ah done tore up dem references," she responded.

"Destroyed your references? How unusual! Don't you realize that that must cause people to suspect that you are not a good servant?"

"Yassum, maybe dat's so," the applicant agreed. "Yo' des' speck Ah ain't er good serbent, but ef Ah had brung dem references yo'd know Ah was crazy!"

Dog Answers Doorbell. There is one dog in London which, were its duties known, we should all join in voting an extra ration. It is the care of an entire household. All the human members of the family are deaf and dumb.

The dog answers the door. That is to say, when it hears a knock or a ring, it conveys the information to its betters by barks, which are detected by the opening and shutting of its mouth, by wagging its tail, and in the last resort by gently pawing its master or mistress and running toward front or back door.—London Chronicle.

And If It Wasn't. The man who had served throughout the war as a private in the base hospital at Angers was loud in his scorn of a neighbor who hadn't gone into the service at all. A friend let him rave on till the Angers soldier had used the word slacker. Then he said:

"That's right, give it to him. All he did during the war was hang on to a nice soft job as testing pilot for the Curtiss people. All he had to do was to fly each machine long enough to see if it was safe for one of our aviators."—The Home Sector.

HOW'S YOUR BLOOD? Pimples and Eruptions Mean Bad Blood

People who have impure or impoverished blood should be careful to take only a temperance remedy made of wild roots and barks, such as Doctor Pierce's Golden Medical Discovery is and has been for nearly 50 years. Ingredients printed on wrapper.

The first day you start to take this reliable medicine, impure germs and accumulations begin to separate in the blood and are then expelled through the eliminative organs.

In place of the impurities, the arteries and veins gradually get fresh vitalized blood and the action of this good blood on the skin means that pimples, boils, carbuncles, eczema, rash, nose and many skin blemishes will disappear. Then you must remember that when the blood is right, the liver, stomach, bowels and kidneys become healthy, active and vigorous and you will have no more troubles with impurities, backache, headache.

Get Doctor Pierce's Golden Medical Discovery to-day at any medicine dealer, in tablet or liquid form, or send 10c for trial package to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y.

NEW ORLEANS, LA.—I could not eat anything greasy for it would make me so sick as my stomach that I could not do my work. It would make me dizzy, and I would have to sit down and wait until it passed away. Then there would be sour risings. I was told to take Dr. Pierce's Golden Medical Discovery, which I did, and I must say that it cured me. I have not felt any of this trouble ever since. I would recommend this remedy with all faith to all who have dyspepsia. —JULES GERVAIN, No. 2740 Franchman Street.
